

ResTech

Reservoir Evaluation Services

Integrated Wilcox Field Studies

ResTech has performed Wilcox studies since 1982. Factors such as net pay, flow potential, drainage area, stimulation effectiveness and geologic control have been addressed numerous times. We look at the whole picture.

Evaluating Available Data

- Well / Field History
- Geologic Maps
- Well Logs
- Core Analysis
- Production / Pressure Data
- Test / Completion Information

For Development of ...

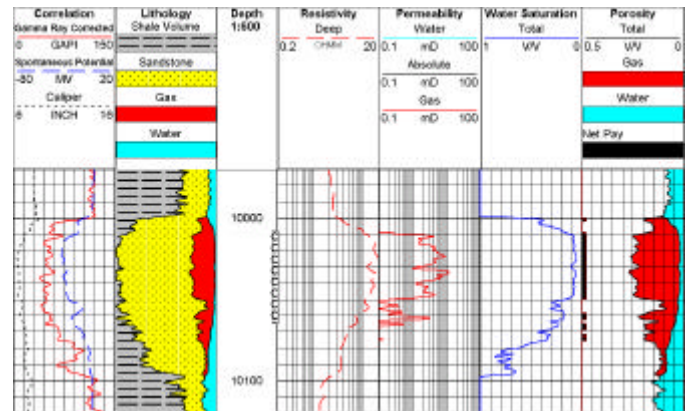

- Net Pay, Øh, HCPV Maps
- Pressure Isobar Maps
- Volumetric / Material Balance Analysis
- PVT / Recovery Efficiency
- Production Forecast Modeling

To Ultimately Determine

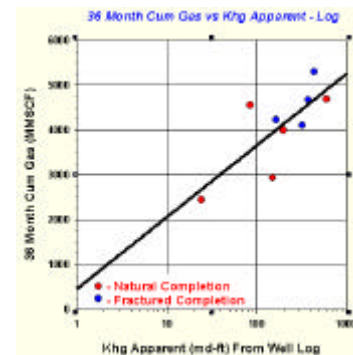

- Original Hydrocarbons – In - Place
- Remaining Reserves
- Stimulation Benefit
- New Drill / Workover Locations
- Well Drainage / Spacing
- Flowstream Projections

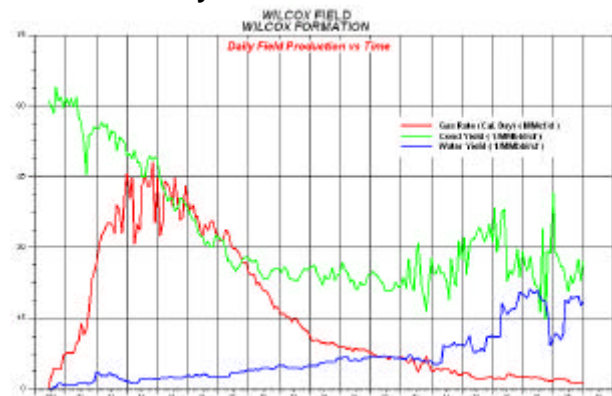

Detailed Petrophysical Analysis

Cumulative Gas vs Khg From Well Logs

Daily Field Production vs. Time
